Azure Platform HLD — Solar System & Starship Fleet

Australia East · dev treated as production-like · as implemented 28 October 2026

Legend and design boundaries

- Application request traffic
- Private Link / private endpoint
- CI/CD, image or data flow
- Identity / RBAC / federation
- Logs and metrics

Public entry: Azure Front Door only for application traffic · Regional origin reached privately · AKS API is restricted public, not private AKS

Source of truth: Terraform roots cicd/shared/dev, kubernetes/dev/agic-ingress.yaml, eso-files/azure, and azure-pipelines.yml
